No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                            US-10-047-021-86

                                                                                                                                                                                                                                                                                                             The invention relates to a method for modulating the amount of Comm (Commissureless) polypeptide in contact with a cell expressing active Robo (roundabout) on its surface. The method comprises modulating the effective amount of Comm polypeptide in contact with the cell, where the amount of expressed active Robo is specifically modulated inversely with the modulation of the effective amount of Comm in contact with the cell. The method is used to modulate the amount of active Robo expressed on a cell. The method can be used to screen for agents that modulate Robo:Comminteractions. This is particularly useful for modulating nerve cell
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               241 AAAGGAGAACTTTTGAACTGCAAAGGTGAAGGCGCCCCACACCCACTATTGAA 300
